

Madison Air Technical Sales Flyer

At Madison Air, we know that precise humidity control is essential for productive workspaces, healthy indoor environments, and high-performance industrial operations. That's why we offer one of the world's most extensive portfolios of custom humidity control solutions designed to meet the demands of virtually any application.

Product Offerings

Semi-Custom Design

- 2000 - 12,500 CFM
- Dew Point: -5F - 35F
- High-efficiency desiccant dehumidification with DH, high-temp regeneration
- Optional energy recovery ventilation (ERV)

Custom Design

- 2,000 - 50,000 CFM
- Dew Point: -20F - 45F
- Ultra-low humidity control, FANWALL TECHNOLOGY, energy recovery wheels, air filtration

Semi-Custom Design

- 300 - 12,500 CFM
- Dew Point: 35F - 50F
- Desiccant dehumidification with DX cooling and regeneration
- Optional ERV

Application Expertise & Performance-Driven Features

(Market Applications Grid Placeholder)

Additional Features

- Multiple heating/cooling options: DX, chilled water, hot water, steam, gas, electric
- Proprietary NovelAire desiccant wheels
- Integrated controls packages
- High-quality insulated cabinet construction
